TH400 Agro Industrial.

TH400 is the new Trelleborg Agro Industrial radial range for the latest generations of telescopic handlers, backhoes and mini loaders. Versatile in several applications, TH400 is able to operate on the toughest soils while coping with the most demanding conditions. The new Trelleborg range provides your machine with high stability even when the boom is fully extended to handle heavy loads. TH400 upgrades the safety standards of your machine while extending the efficiency of your operations.

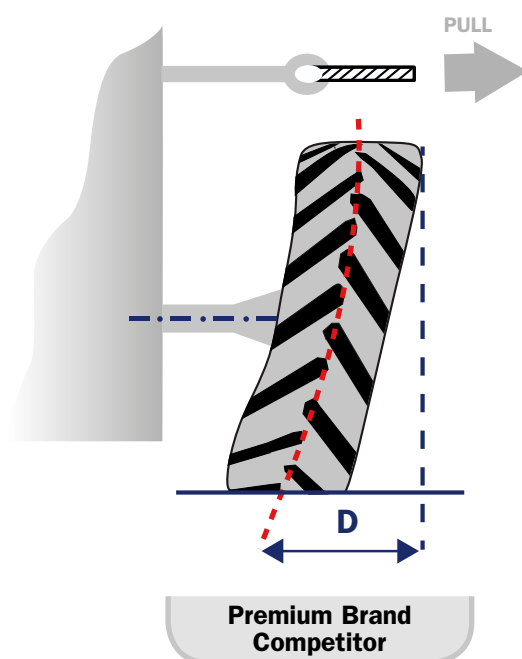

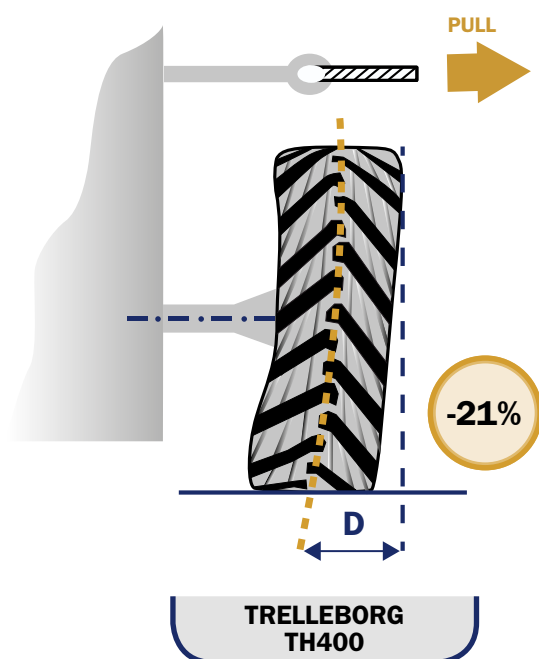

Printed on
recycled paper

High lateral stability, great manoeuvrability premium comfort

The advanced TH400 radial carcass along with the reinforced structure ensure the maximum machine stability even on tough slopes permitting

great manoeuvrability and comfort. The TH400 design results in a reduction of lateral deformation of more than 20%.

LATERAL STABILITY

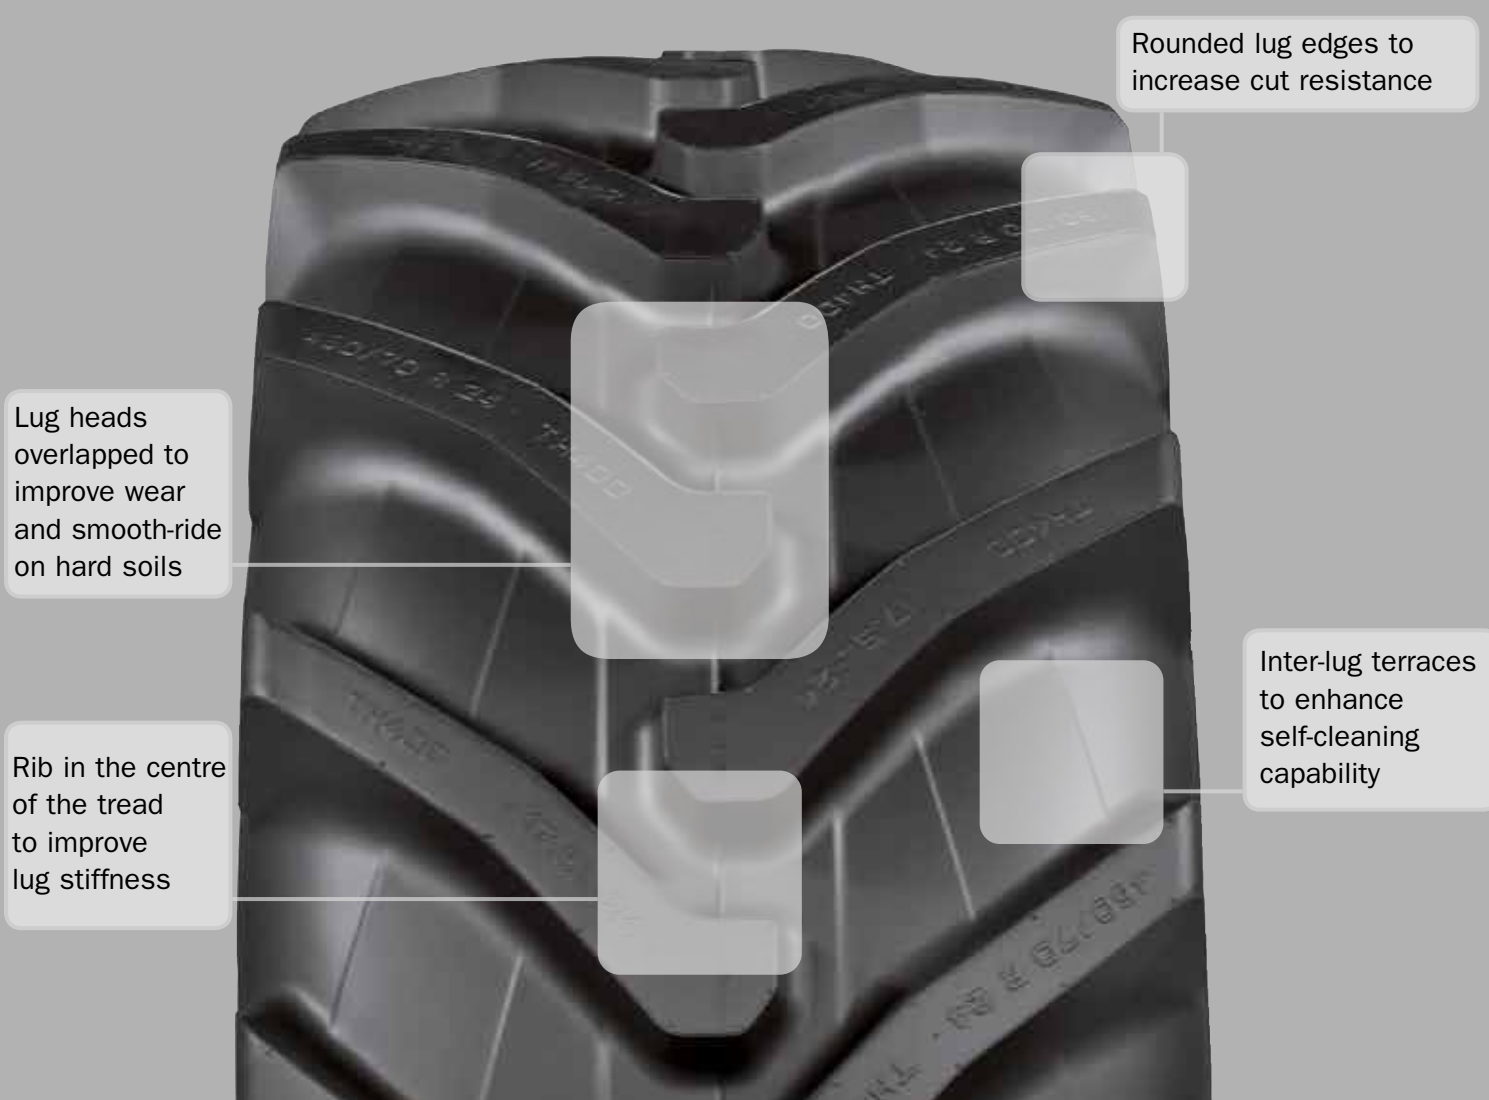

Test conditions
Reference size: 460/70R24
Pull force: from 1,000 Kg to 6,000 Kg
D: Displacement

Excellent resistance to abrasion and wear

The innovative TH400 tread pattern has been engineered and designed to maximize abrasion and wear resistance, boosting the overall

strength and mileage of the tyre, even on the toughest soils whilst handling heavy loads.

Best traction, optimum self-cleaning

The shoulder and the lug shapes lead to high traction capacity during farming applications even on muddy and soft soils.

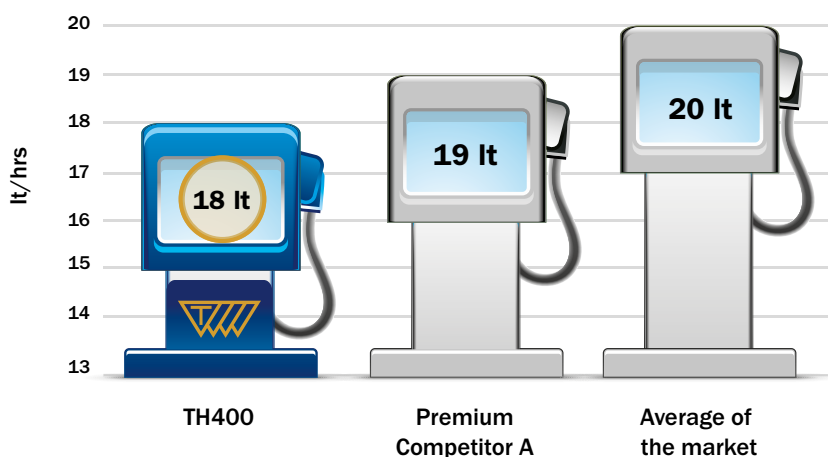

The unique Trelleborg design at the base of the lug enhances the self-cleaning performance of the tyre.

Reduced fuel consumption, lower emission

TH400 excels in rolling resistance performance with consequent low fuel consumption and

emissions, increasing your operation profitability while respecting the environment.

FUEL CONSUMPTION

Test conditions
Reference size: 460/70R24
Vehicle: 120 hp
Fuel cost: 0.65 €/lt
900 working hours per year

Compared with the average of the market, TH400 provides you with a saving of 9% less fuel consumption per year.
TH400. Extend the efficiency of your operations.

TH500 Agro Industrial.

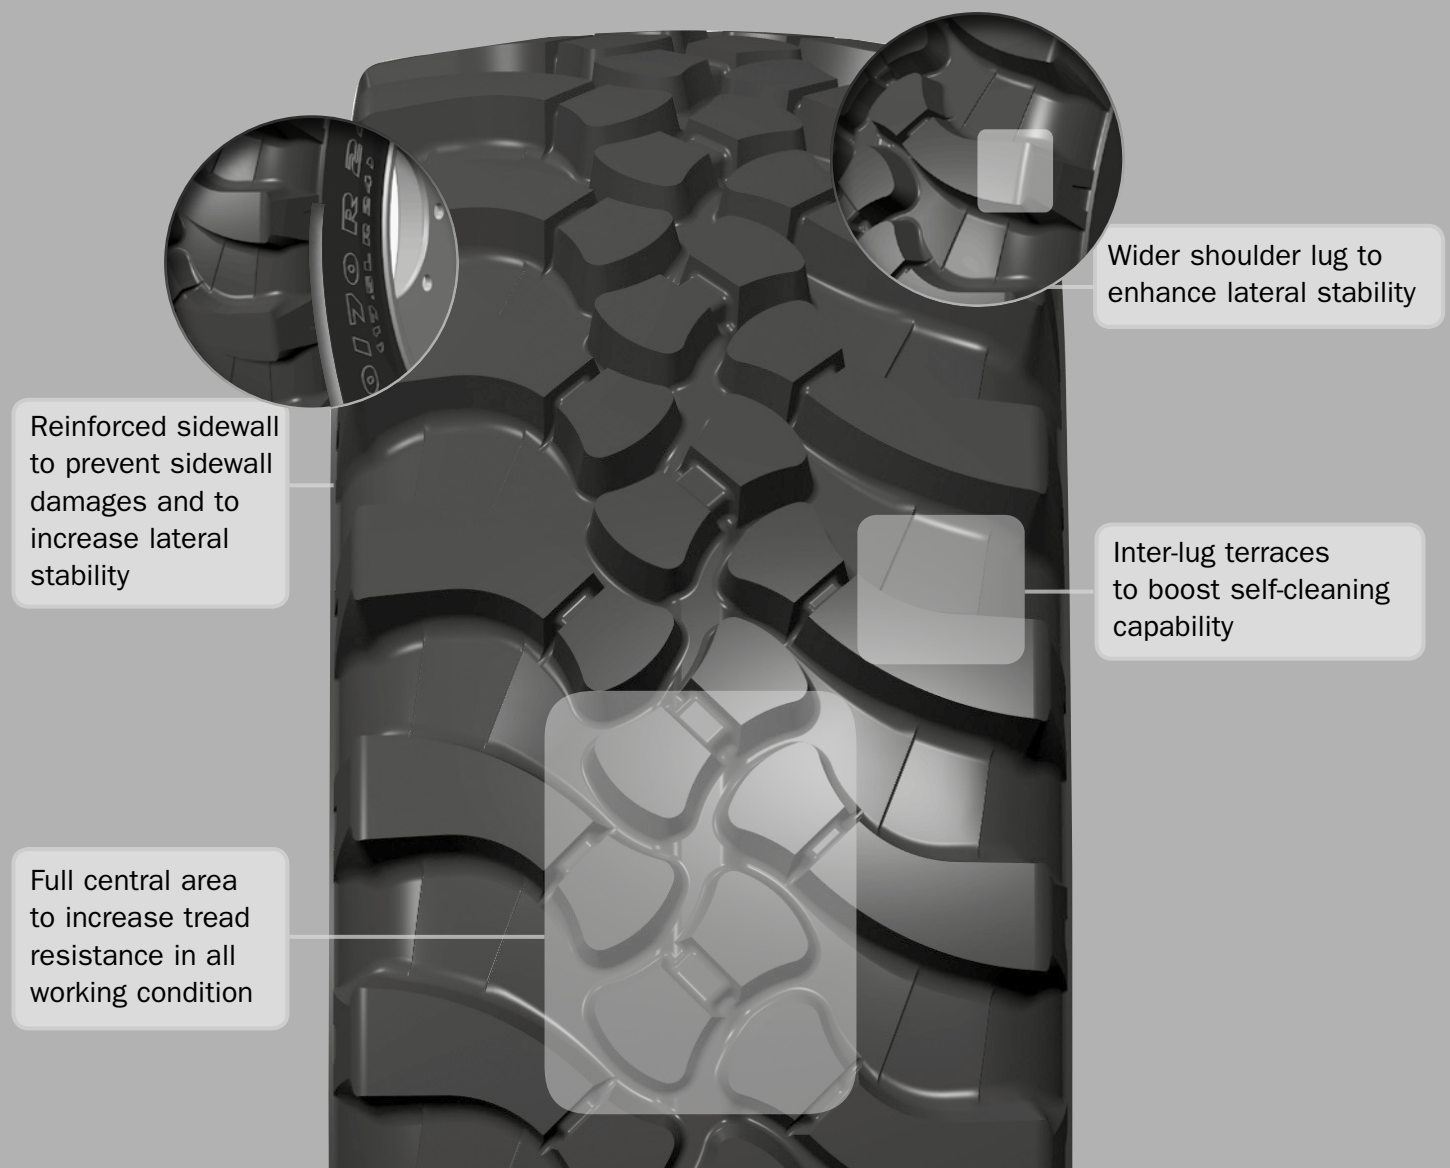

The new Trelleborg TH500 Agro Industrial completely meets the needs of telehandlers and backhoes operating on hard surface. Road transport and usage in yards is growing as

well as the need for our customers to rely on a tire able to guarantee excellent performance in all demanding situations.

Superior tread resistance

The TH500 tread design is very closed in the center to guarantee tyre's long life while opened in the shoulder area to ensure the perfect clean out of the tyre enhanced by the inter-lug terraces

between the lugs. The tread design as a whole assures high traction capacity and premium self-cleaning performance.
